THE BOILERMAKER

Barbecoa Single Barrel Bourbon
& Freedom Draft Beer

£10

"The steel mills are all gone but Boilermakers are still served at every local in the area.

The Boilermaker is a drink that cuts right through the heat, dirt and dust of the steel mills. It was a way to get your energy fast and replace your fluids lost in the heat of day. It was a way to forget how hard you worked, and how hard you will work the next day, and the day after that... You stopped every day with the guys you worked with and had a Boilermaker with the boys. We ate, drank, worked, cried and loved together. The Boilermaker was the cement that held us all together."

Vince Orend - Pennsylvania Steelworker

LONG & REFRESHING

There's a lot more to making a refreshing drink than pouring a measure of gin into a tall glass with some tonic. Long ago, tall drinks all had very specific names, based on a precise balancing of ingredients.

The Collins, for example, was to be built by mixing a spirit with soda, lemon and sugar in a tall glass over ice. The Fizz called for shaking the same ingredients together and serving it 'up'. If you prefer lime to lemon in your Collins, then you're drinking a Rickey, or if you prefer ginger over soda, you've got yourself a Mule.

The smallest change in ingredients or mixing can have a big impact on the flavour of your drink. Let us know how you like yours.

SOURS

Most historians agree that we owe the creation of the Sour to the sea-faring heroes of the 18th Century. In need of something safe to drink, they would often add their alcohol ration to water and mix in some citrus and sugar to balance the flavour.

A drink both essential and integral to cocktail history, this humble drink fell out of favour for a time. The crudely made spirits of prohibition couldn't agree with the simplicity of the Sour, and with the dawn of sours mix some decades later, bartenders would favour convenience over care and attention.

Our sours draw inspiration from those early recipes keeping the original concept at their core – spirit, citrus, water and sugar.

SPIRITED

The word 'cocktail' was once famously explained in an 1806 issue of a New York-based newspaper The Balance and Columbian Repository. It stated that "cock-tail is a stimulating liquor, composed of spirits of any kind, sugar, water and bitters."

By the 1860s, mixed drinks had evolved and cocktails would often include curaçao, absinthe and other liqueurs as their sweetener. Discerning drinkers, possibly growing weary of these fancy drinks or feeling nostalgic, began asking for their drinks to be mixed the old-fashioned way.

These drinks are our tribute to the early days of mixed drinks, when it was all about the spritis.

OLD FASHIONEDS

The Old Fashioned is widely regarded as one of the all time classic cocktails with the likes of the Martini and Manhattan.

The first documented definition of the word “cocktail” was in response to a reader’s letter to a New York magazine asking to define the word. In the May 13, 1806 issue, the paper’s editor wrote that it was a potent concoction of spirits, bitters, water, and sugar; it was also referred to at the time as a bittered sling.

These drinks are our take on this classic cocktail, showcasing whiskies from around the world.

NO ALCOHOL

In 1894, a young man named Wayne Wheeler was offered a job in a new organisation called the 'Anti-Saloon League'. This job offer would change bartending in the US - and indeed the world - forever.

Together with others from the 'Temperance Movement', he helped pass the 'National Prohibition Act' in the US. With the sale of alcohol prohibited, many great bartenders fled the US - often ending up right here in London. Prohibition didn't last and all that remains of it's legacy lives on in the 'speak-easy' bars across the world.

Whilst we're no fans of the 'Temperance Movement' we still recognise the importance of moderation. With flavour and refreshment as our top priorities we've created a selection of alcohol free drinks we're sure Wayne Wheeler would have loved.
